

Torex™ OSCAR-POS for retail delivers comprehensive control of all retail operations – including point-of-service (POS), back office and head office – in a single cost-effective solution.

The challenge

Many retailers with multiple stores have patched together a tangled mix of legacy applications – an approach that becomes less and less effective over time. Systems like these often:

- Aren't well-connected to one another
- Aren't scalable
- Don't integrate well, requiring extensive manual intervention to process data between each other
- Have a high cost of ownership, due to the need for multiple software maintenance contracts

Clearly, the time has come for a complete management and control system that can handle all your POS needs across all your retail operations

Define customer experience with Torex OSCAR-POS for retail

Torex OSCAR-POS for retail is ideal for fast-moving retail environments with anywhere from one POS terminal to several hundred. This fully integrated retail management solution can handle POS as well as:

- Merchandising and planning
- Sales and profit analysis
- Stock control

- Supply chain functionality
- Retail accounting
- Financial reporting

In other words, Torex has everything you need to run your entire retail enterprise. And our solutions reflect 20+ years of experience serving some of the biggest retailing names in the world.

The solution

Ease of use

This easy-to-use solution features a customisable touch screen for both POS and management functions, bringing employees up to speed quickly with minimal training.

Product identification assistance

Suppose your operators are faced with products that are difficult to identify. No problem. Our system can display a text description along with pictures, allowing operators to deliver better customer service.

Customer loyalty rewards

Torex OSCAR-POS for retail lets you apply customer loyalty scheme benefits automatically (e.g. discounts for regular customers) — another nice boost to your customer service efforts.

Multi-currency capabilities

For those retail businesses operating internationally, our solution offers a variety of languages and handles many currencies. Automatic conversion to the native language is available if needed.

Integrated data communication

Robust internal data communication mechanisms automatically handle data flows between POS, back office and head office. There's no need to buy a third-party product for this function, resulting in significant cost savings.

Comprehensive stock management

Stock management automatically updates your files by sharing data in real time between the POS terminals and your systems. Get a complete overview of your stock and related information, helping you manage your stocks and promotions more effectively. Plus, manage stock and price maintenance for several POS systems and branches from a centralised location.

Better customer management

With Torex OSCAR-POS for retail, you can classify customers into different groups with different store benefits. When specific customers are recognised, the system can automatically apply privileges such as individual price lists, loyalty points or discounts.

A fully open solution

Built on a Windows platform, Torex OSCAR-POS for retail has the ability to run on Microsoft® SQL Server and Oracle®. As a result, this fully open solution is compatible with other standard applications in your retail environment.

And more ...

Other Torex OSCAR-POS for retail highlights include:

- Comprehensive reporting and analysis capabilities
- Flexibility with a variety of modular components
- Ability to handle multi-format environments
- EFT, EMV and cashback capabilities

Achieve results now

Torex OSCAR-POS for retail can also produce benefits like these for retail outlets:

- Increases in sales
- Faster transactions
- Reductions in inventory
- Better purchasing
- More efficient promotions
- Lower operation costs
- Healthier margins
- Consistent gains in business performance
